

# Work Style Innovation

Mobile Service Platform <FUJITSU Cloud PaaS MobileSUITE™>

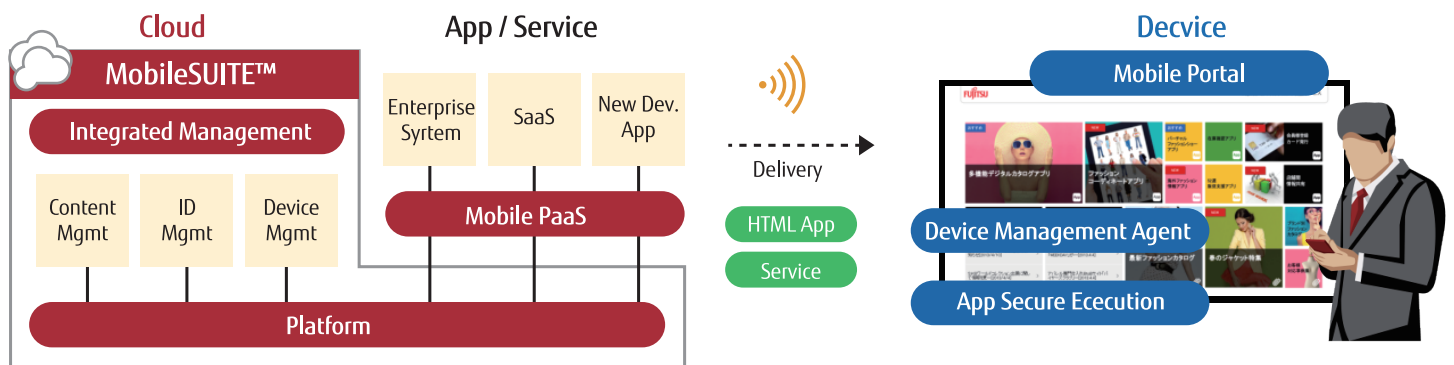

Demonstration  
Version Only

## Customer Benefits

- Reduction in development period and man-hours.
- Integrated management of applications and mobile devices, based on your company's policies.
- Private application delivery environment, which improves security and reduces the developers' load.
- Improvement of work efficiency with enterprise use of mobile devices.

## About MobileSUITE™

MobileSUITE™ is a service platform which connects enterprise applications to mobile devices. This service encourages Enterprise use of mobiles with correspondence between existing systems and usage in a secure environment.

What MobileSUITE™ can do...

- 1: Deliver HTML app/service (which are linked to MobileSUITE™) to mobile devices.
- 2: Have integrated management (app, service, ID, device).
- 3: Access to services with "One ID".

## Introduction Effect

### Issues

- Difficult to manage all IDs, apps, devices, and security countermeasures.
- Time consuming and costly to correspond each enterprise system to mobile devices.
- Can't use mobiles in business scenarios if they are just given to users.

### What MobileSUITE™ can do

- Reduce management man-hours by integrating the management of each item and its security countermeasures.
- Improve work efficiency by being available to work anytime and anywhere.
- Deliver and manage enterprise contents from managers, so users have no added load when mobile is introduced.

# Key Advantages of MobileSUITE™ Service

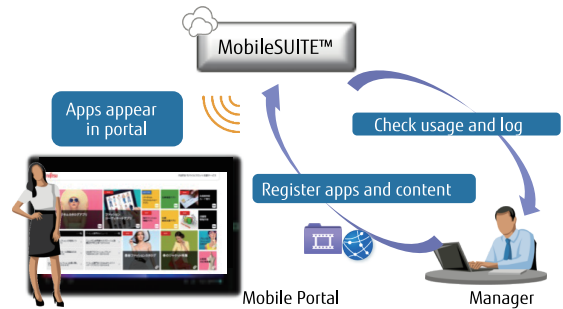

## Easy Enterprise Use of Mobiles

A "Mobile Portal," which manages enterprise apps and contents, that users can access with SSO (Single Sign On.)

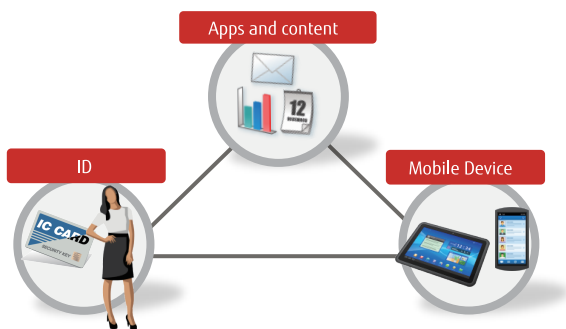

## Business Improvement by logging usage, etc.

Not only integrated management. Managers can check users' app usage and log this for business improvement.

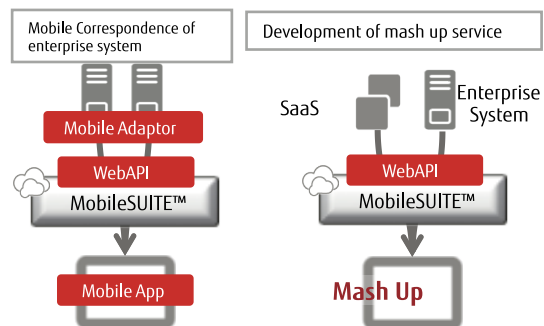

## Integrated Management

With the MobileSUITE™ management console, managers can control users' content, IDs, and devices all at once.

## Added Value by Mash Up Service

Offer mobile correspondence of enterprise system, and mash up service, which link SaaS and enterprise system.
