

Work Style Innovation

Fujitsu Provides Devices, Platforms, Services of Comfortable Mobile Work.

Customer Benefits

- Using Fujitsu Devices, Platforms, and Services Customer can “Easily”, “Usefully”, “Safely” Implement Mobile Business Style.

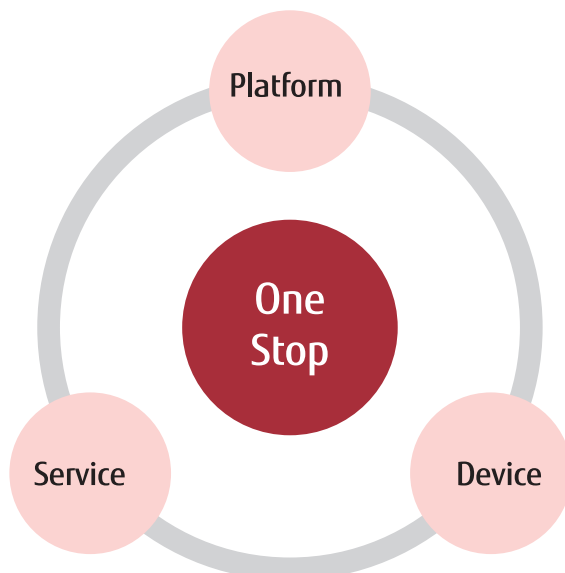

Customers Issues

- Difficult to manage all IDs, apps, devices, and security countermeasures.
Need lots of time and cost to make each enterprise system corresponds to mobile devices.
- Requires more durable and useful tablet in various work environments.
- Concern the risk of losing company’s credibility by data leak from employee’s PCs.

Fujitsu’s proposal

One stop solution makes your Mobile Business Style “Easy”, “Useful”, “Safe”.

Platform

- Mobile Service Platform

Service

- Palm Vein authentication
- Remote data deletion

Device

- Water / dust / alcohol proof tablet
- Various Accessories of tablet on the job

Platform

■ Mobile Service Platform with "FUJITSU Cloud PaaS MobileSUITE™"

- MobileSUITE encourages enterprise use of mobiles with correspondence between existing systems and usage in a secure environment.
- Users can improve work efficiency by using enterprise app/ service anytime and anywhere.
- Managers have integrated management of apps, devices, and IDs, based on the company's policy.

■ Mobile Service Platform with "FUJITSU Managed Infrastructure Services Managed Mobile"

- Managed Mobile provides effective mobile application and device management, using enterprise-class cloud services to manage, support and control your mobile environment, safeguarding corporate data and protecting privacy.
- Managed Mobile offers the ability to lock down and remotely wipe devices in the event of theft or loss of a device. Managed Mobile is a global offering and includes a comprehensive end-to-end mobile application service suite that enables mobile application development and a mobile app store.

Service

■ Palm Vein Authentication

- Fujitsu offers the world's smallest, slimmest and lightest contact-free palm vein sensor which can easily be incorporated into slim PCs and tablets for the palm vein authentication.
- Palm vein authentication provides high security level, high accuracy, and high applicability because of high amount of unique vessel patterns. This allows users to enjoy contactless and hygienic operation without traceability.

■ Remote Data Deletion with "CLEARSURE"

- CLEARSURE prevents data leaks from a lost or stolen PC by making it possible to remotely lock or delete data from a PC via W-WAN, even when it is in shutdown.
- After the "PC lock" and "Data deletion", users receive a status report including the PC's location and the time of the last login. This allows users to know the risk of data leaks by comparing login time with the time that the PC was lost.

Device

■ Water / Dust / Alcohol Proof Tablet.

- Tablet featuring both cooling fan and waterproof / dustproof construction. (Fan only with STYLISTIC Q704)
- Waterproof (tested for IPX5/7/8 specifications) functions normally after being immersed in room-temp tap water to a depth of 1.5m for 30minutes.
- Resistant to alcohol-based wipes, durable chemically strengthened both glass display and back side.

■ Various Accessories of Tablet on the Job.

Accessories of Q584/Q704 such as a shoulder strap, a hand-strap, a VESA mount, a keyboard as well as compatibility with smart cards, ensure ease of use in various work environments.

By placing the Q704 in the docking cradle, Turbo Mode can boost CPU performance to 100%. (Due to insufficient cooling, most tablets cannot achieve 100% CPU performance.)

The Q704 can be connected to either a lightweight, slim keyboard or a docking keyboard with a built-in battery.
